

Cousin - IT (Addams Family)

Grocery List:

- Large Tomato Cage
- Grass Skirts, Tan (6) or Table Runner
- Sunglasses, Black
- Derby Hat, Black

Tools Needed:

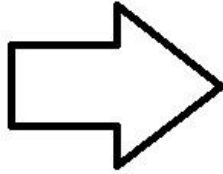

- Scissors
- Pliers
- Hot Glue Gun w/glue

Directions: (Note use provided pictures to help)

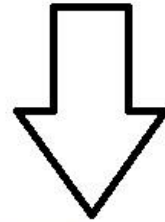

- 1. Start by bending the top of the tomato cage bars. Bend them inward to roughly the size of the inside of the Bolder hat. Using a pair of pliers bend down the first 1" of the bars to create a base for the hat to sit on.**
- 2. Using the grass skirt, start by hot glueing the skirt to the frame. Sitting the cage on the ground, let the skirt hit the ground to cover the bars, then start wrapping the skirt around the cage, hot glueing as you go.**
- 3. If you have enough skirts you can double wrap them. This way it is hard to see through the prop once completed.**
- 4. Once your first level of skirting is done. Start your second row of skirting roughly half way up the first row. You want overlap from one level to the next.**
- 5. After second row, now the third row, which should be close to the top. This should complete the grass skirting part of the prop.**
- 6. Place Bolder hat on prop. Position sunglasses where they should be and hot glue them in to place. You can hot glue the hat in place if you wish. Cousin-IT is complete**
